

Project title: Real time River water qualityMonitoring and control system

Team id:PNT2022TMID06065.

Real time River water quality Monitoring using IOT.

Definition.

Our project is for analyse the turbidity in river water,

Process.

The turbidity sensor analyse the purity level.LED display provide the percentage.

Market opportunity

The market opportunity for our project is very high.Because all humans need a pure water.

Project-Timeline

The timeline of our project is nearly two-three months.

Budget

The budget of our project is nearly Rs.4,000-5,500

Goal

The main goal of our project is to provide a pure water for all.

Customers

Mainly for people who need pure water.

Usage

Main usage is to purify the water that essential for us
